

Dr. Spa, MD
Hot Tub Specialist

Mainely Tubs presents:

Dr. Spa Support,

Dr Spa here! Heard you wanted some heat in your tub... after all, it is a HOT tub. Let's get it up and going again for you.

Heaters from 1995 or before

1. Unplug the spa (110v), or turn the breakers off (220v).
2. **REMOVE the filters** from the spa and **do not return them to spa until the water is heated.**
3. Remove any debris from the filter compartment.
4. Open the equipment compartment door.
5. Reset the heater hi limit and spa hi limit located on the left side of the control box.
6. Close the equipment compartment door.
7. Plug the spa in (110v), or turn both breakers on (220v).
8. Check the spa for heat after 24 hours (110v) or 12 hours (220v).

If the spa is still not heating, service is required – call 207-883-9193 or email kbevan@mainelytubs.com
